

TD SOC Resiliency Upgrades

Scarborough, ON

Owner: TD Bank
Value: \$11,000,000
Date: May 2015
Trades: Electrical

Project Description and Scope:

Resiliency upgrades of the existing Critical Power Distribution system, including removal of existing equipment and installations of 2MW Generator, 4MW Transformer, HV Switchgear, LV Switchgear, Automatic Transfer Switches, 5 Module UPS System and Batteries, SSTTS static Transfer Switches, UPS Output Switchboards, and Bus-Duct. Included with this were major modifications to the Existing Generator controls, HV Monitoring and CMS modifications. All work was completed and fully commissioned without interruption to the critical operation of the facility.

MISSION CRITICAL FACILITIES
