

## Toyota Motor Manufacturing Canada Frame Body Re-spot Installation *Cambridge, ON*

**Owner:** Toyota Motor Mfg. Canada

**Value:** \$1,300,000

**Date:** May 2012

**Trades:** Electrical  
Mechanical  
Millwright & Rigging  
Ironwork

### Project Description and Scope:

Complete turnkey installation of the Frame Body Re-spot robot line complete with conveyors.

Turnkey multi-trade installation consisting of power distribution, robots, conveyors, safety fencing, controls, communications, weld water, compressed air and mixed gases. This installation was performed on a tight timeline during an owner accelerated schedule.

State was integral to the project from the tender award to final commissioning of the project.

Coordination with TEMA, Toyota Production and other Contractors in the area was a key component so as not to impact the production of the plant during the construction activities. With safety being a key component in working at Toyota, State maintained our zero-injury site record throughout the installation.
