Piping  
Millwrighting & Rigging  
Civil

### Project Description and Scope:

The State Group has remained a resident Multi-trade contractor at the Princeton Facility since the plant's construction in 1996 and provides on-going daily services.

The following represents a broad overview of the major programs State has played an active role in:

- West Plant Construction
- East Plant Construction
- Plastics Shop Construction and Addition
- T100 Vehicle Launch
- Tundra Vehicle Launch
- Sequoia Vehicle Launch
- Sienna Vehicle Launch
- Sienna Second Generation Launch
- Sienna Third Generation Launch
- Highlander Vehicle Launch
- Highlander Second Generation/ Right Hand Steer

State Group routinely performs work in all of the Princeton Facilities and in all facets of the production processes within the facility. We have developed a skilled work force intimately familiar with the customers' expectations and procedures, which has evolved to a point where we have the ability to deliver, on a single source basis, the challenges of an operating automotive facility. We have averaged over 75,000 man hours of self-performed work over the last 5 years.

State has consistently maintained a presence on site, assisting with the day-to-day construction maintenance and capital improvement projects.
